

A comprehensive logistics site for growing semiconductor materials demands

# NRS LOGIOS AMERICA INC.

In May 2025, NRS established **NRS LOGIOS AMERICA INC.** in Arizona, USA, as a new comprehensive logistics site. As well as responding to strong demand for logistics relating to chemical products – particularly those connected with semiconductors and battery materials – this new company provides a range of logistics functions as a one-stop service with the aim of optimizing customers' supply chains. Together with NRS OCEAN LOGISTICS LTD. and NRS LOGISTICS AMERICA INC. of the NRS GROUP, NRS LOGIOS AMERICA INC. delivers optimized, high-quality logistics services.

Hazardous materials warehouse

Warehouse interior

High-pressure gas pad

ISO tank container storage

## Five Key Features

**01**

Temperature-controlled  
hazardous materials  
warehouse

**02**

High-pressure gas pad

**03**

Storage and shipment  
at the desired  
temperature

**04**

International intermodal  
transport for import  
and export

**05**

Rail transport

The site is equipped with a temperature-controlled hazardous material warehouse able to handle a range of chemicals, including flammable and corrosive substances used in semiconductor and battery manufacturing, in addition to a storage facility for high-pressure gases (including toxic gases) in ISO tank containers. Furthermore, plans are in place to construct a siding for rail transport at the site, enabling it to provide a one-stop logistics service encompassing storage and shipment at the desired temperature, international intermodal transport for import and export, and rail transportation. This will enable the site to offer a smooth modal shift for freight arriving from the west coast while also contributing to flexible service provision, enhanced international and domestic market access as a stock point, and a reduction in CO<sub>2</sub> emissions through environmentally-friendly rail transport.

# OVERVIEW OF NRS LOGIOS AMERICA INC.

## Getting here

- From Long Beach, Los Angeles ..... 680km
- From Houston ..... 1,920km

Utilizing NRS LOGIOS AMERICA INC. as a stock point and working in cooperation with the NRS GROUP's NRS LOGISTICS AMERICA INC. (New York) and NRS OCEAN LOGISTICS LTD. (Houston) enables the provision of service to anywhere in the US. Rail transport between LA and Phoenix can also be arranged depending on the goods to be carried, so please feel free to contact us at anytime.

## Facility Overview

- |  |  |
|--|--|
| ■ Name : NRS LOGIOS AMERICA INC.   | ■ Transport : ISO tank containers, trucks, international intermodal transport, customs clearance, rail                       |
| ■ Location : 1799 N Ethington Road, Casa Grande, Arizona, 85193 U.S.A.   | ■ Products handled : Hazardous materials, poisonous and deleterious substances, high-pressure gas, general chemical products |
| ■ Area : 160,000 m <sup>2</sup> (approx.)  | ■ Packaging : Bottles, cans, drums, cylinders, IBCs, ISO tank containers, MEGCS, etc.  |
| ■ Facilities : General goods warehouse, hazardous materials warehouse<br>High-pressure gas pad<br>ISO tank container storage, ISO tank container maintenance<br>High-pressure gas (toxic gas) storage facilities for ISO tank containers<br>Emergency power generators |  |

NRS has a wealth of experience and a proven track record,  
so feel free to contact us regarding any challenges you face in relation to the transport,  
storage, forwarding, customs clearance of chemical products in the US.
