

Comprehensive one-stop logistics for semiconductor raw materials and more

NRS TO OPEN NEW BRANCH IN KUMAMOTO

« Illustration »

**NRS
Kumamoto Branch**

NRS will open a branch in Kumamoto in July 2023 as a new comprehensive logistics site in the Kyushu area. Demand is expected to grow for temperature-controlled chemicals and high-pressure gases related to the raw materials for semiconductors, so with a focus on these products, this Kumamoto Branch will provide the comprehensive logistics service that NRS proudly offers. From warehouse storage to import/export and transport, the Kumamoto Branch will help customers to optimize their supply chain through this comprehensive logistics service.

« Office building at the Kumamoto Branch »

The Kumamoto Branch will be located very close to the Kumamoto Prefecture Semicon Techno Park. With this superb, almost central location on the island of Kyushu (Japan's third largest island), the branch will be only 2km from the Ozu Interchange, 12km from Kumamoto Airport, and 70km from Yatsushiro Port, meaning its excellent connections will also add to its appeal.

Kumamoto Branch Overview

Facilities

Hazardous materials warehouse
(controlled/ambient temperature)

General goods warehouse
(controlled / ambient temperature)

High-pressure gas storage

ISO tank container storage
Liquid chemicals, high-pressure gas (inert gas) and empty containers

Transport tank container / controlled temperature truck transport

Business Details

The Kumamoto Branch will be able to provide **temperature-controlled storage and high-pressure gas storage** for chemical products related to raw materials for semiconductors and other materials (Category IV goods and designated flammable goods under the Fire Services Act, goods covered by the Poisonous and Deleterious Substances Control Act and the High Pressure Gas Safety Act, and general chemical products). It will provide a one-stop logistics service that includes storage and shipment at the desired temperature, international intermodal transport for import and export, and domestic coastal shipping and rail transport. The Kumamoto Branch will play a central role in the Kyushu area, and will work with other nearby NRS offices (including the Kyushu Logistics Center and Kitakyushu Office) to deliver an optimum, high-quality logistics service.

Getting here

from	● KUMAMOTO Airport 12km
	● YATSUSHIRO Port 70km
	● HAKATA Port 120km

- **Location :** Takaono 272-48, Ozumachi, Kikuchi-gun, Kumamoto Prefecture, Japan, 869-1232
- **Products handled :** Fire Service Act hazardous materials (Category IV), poisonous and deleterious substances, high-pressure gas, general chemical products
- **Facilities :**
 - ① General goods warehouse (controlled/ambient temperature)
 - ② Hazardous materials warehouse (controlled/ambient temperature)
 - ③ High-pressure gas storage
 - ④ ISO tank container storage: for liquid chemicals, high-pressure gas, and empty containers
 - ⑤ High-pressure gas (toxic gas) storage facilities for ISO tank containers
 - ⑥ Transport: ISO tank container transport, truck transport (including temperature-controlled trucks)
 - ⑦ Emergency power generators
