

Comprehensive one-stop logistics for semiconductor raw materials and more

NRS OPENS NEW BRANCH IN KUMAMOTO

NRS opened a branch in Kumamoto in August 2023 as a new comprehensive logistics site in the Kyushu area. Demand is expected to grow for temperature-controlled chemicals and high-pressure gases related to the raw materials for semiconductors. With a focus on these products, the Kumamoto Branch provides the comprehensive logistics service that NRS proudly offers. From warehouse storage to import/export and transport, the Kumamoto Branch helps customers to optimize their supply chain through this comprehensive logistics service.

The Kumamoto Branch is located in proximity to the Kumamoto Prefecture Semicon TechnoPark. With this superb, almost central location on the island of Kyushu (Japan's third largest island), the branch is only 2km from the Ozu Interchange, 12km from Kumamoto Airport, and 70km from Yatsushiro Port, meaning its excellent connections are also added to its appeal.

Kumamoto Branch Overview

Facilities

Hazardous materials warehouse
(controlled temperature)

General goods warehouse
(controlled temperature)

High-pressure gas storage

ISO tank container storage
Liquid chemicals and empty containers

Transport tank container / controlled temperature truck transport

Business Details

The Kumamoto Branch is able to provide **temperature-controlled storage and high-pressure gas storage** for chemical products related to raw materials for semiconductors and other materials (Category IV goods and designated flammable goods under the Fire Services Act, goods covered by the Poisonous and Deleterious Substances Control Act and the High-Pressure Gas Safety Act, and general chemical products). It provides a one-stop logistics service that includes storage and shipment at the desired temperature, international intermodal transport for import and export, and domestic coastal shipping and rail transport. The Kumamoto Branch plays a central role in the Kyushu area, and works with other nearby NRS offices (including the Kyushu Logistics Center and Kitakyushu Office) to deliver an optimum, high-quality logistics service.

Getting here

from	● KUMAMOTO Airport 12km	
	● YATSUSHIRO Port 70km	
	● HAKATA Port 120km	

- **Location :** Takaono 272-48, Ozumachi, Kikuchi-gun, Kumamoto Prefecture, Japan, 869-1232
- **Products handled :** Fire Service Act hazardous materials (Category III,IV), poisonous and deleterious substances, high-pressure gas, general chemical products
- **Facilities :**
 - ① General goods warehouse (controlled temperature)
 - ② Hazardous materials warehouse (controlled temperature)
 - ③ High-pressure gas storage (cylinder,etc.)
 - ④ High-pressure gas storage (ISO tank container,MEGCs.)
 - ⑤ ISO tank container storage: Fire Service Act hazardous materials (Category IV)
 - ⑥ ISO tank container storage: Liquid chemicals, empty container
 - ⑦ Inland bonded storage
 - ⑧ Transport: ISO tank container transport, truck transport (including temperature-controlled trucks)
 - ⑨ Emergency power generators
