## NRS Transitions to 100% Renewable Electricity at Two Additional Locations

NRS CORPORATION has successfully transitioned two additional locations to 100% renewable energy, as part of its commitment to achieving carbon neutrality by its centennial anniversary in 2046. This initiative is a step towards increasing the ratio of renewable energy in the company's overall power consumption to 18%.

### The newly transitioned locations to 100% renewable energy:

Site	Start	Annual CO <sub>2</sub> emissions reduced (t-CO <sub>2</sub> /Y) approx.
Nagoya Chemport	4/1	511t-CO <sub>2</sub> /Y
Tokyo Chemical Center Nagoya Office	4/1	25t-CO <sub>2</sub> /Y
Total		536t-CO <sub>2</sub> /Y

### Locations that have already been transitioned:

- Head office(Kowa Hitotsubashi Building)
- Bulk logistics offices(Chiba, Gunma, Niigata, Nagoya, Osaka, Kobe, Kitakyushu)
- Depots(ConTech: Kawasaki, Kobe, Shunan)
- Kumamoto Branch

The effect of reducing CO<sub>2</sub> emission is expected to be approximately 536ton per year, which is equivalent to approximately 3.7% of the domestic Group's total CO<sub>2</sub> emissions (Scope 1+2).

NRS GROUP is committed to solving social issues through its business and contributing to the realization of a sustainable society under the corporate mission "To provide the optimal solution to the world's chemical-logistics industry, NRS has the answer."
