

Environmental Policy

Basic Policy

As a comprehensive logistics company specializing in chemical products, we contribute to the realization of a sustainable society by ensuring strict legal compliance and establishing logistics systems with minimal environmental impact.

Action Guidelines

1. We minimize risks associated with chemical logistics to prevent negative environmental impacts on air, water, oceans, soil, biodiversity, and forests.
2. We adhere to environmental laws, local ordinances, and international standards for hazardous materials transportation.
3. We are committed to preventing global warming by promoting greenhouse gas reduction and eco-driving initiatives.
4. We implement thorough waste management and recycling practices to contribute to a resource-circulating society.
5. We strive for the sustainable use of energy and resources by promoting energy efficiency, resource conservation, the use of renewable energy, and green procurement.
